

Cyber Risk & Security Consultant

Beijaflore is a management consulting firm created in 2000 that today employs more than 1000 persons across Paris, Brussels, Sao Paulo and New York. Our mission is to support our customers with their digital transformation projects and help them shape the future. Since its creation, the firm has been growing steadily based primarily on organic growth, as well as the acquisition of Headlink Partners in 2007, YKems in 2009 and Maksen in 2017. The Group aims to continue this growth in the coming years through the development of additional expertise and the acquisition of new consulting firms in France and abroad.

Would you like to advise our key account customers on their IT risk, IT controls & information security, and industrial Cyber security issues?

In the context of the digital revolution where cyber attacks are becoming more commonplace, the cyber threat is putting more and more pressure on companies. As a result, Executive Committees, sector regulators and legislators are increasing initiatives and security requirements for companies to observe.

Our Cyber Risk and Security Business Unit, with more than 160 people across our offices worldwide, supports more than 40 leading groups in the assessment of cyber risk and the deployment of security systems. Our activity has experienced an average growth of more than 30% since 2010.

On a daily basis, our two main issues are:

- Integrating organisational, methodological and technological innovation into our solutions.
- Mobilising key players within the firm to build together pragmatic and sustainable solutions.

Would you like to better understand the regulatory constraints and help to expand the skills of customer service teams?

You will help our clients establish a strong relationship with all business departments and develop an agile operational model with a high level of expertise. You will support them in involving business sponsors, aligning security solutions with business issues, optimising efficient security processes, ensuring successful security projects and integrating security in digital projects.

Would you like to build your career and evolve in a meritocratic environment?

At Beijaflore, there are professional opportunities for everyone. Evolving with us means benefiting from an agile meritocratic system that is clearly defined through six bands. On average consultants evolve from one band to the next within three years. Each band is associated with increasing levels of responsibility. Our goal is to support you in the development of your career path, and to allow you to benefit from our relocation opportunities in France and abroad.

Do you hold a Master's degree in Engineering or Business? Are you curious-minded and customer oriented? Are you curious-minded and customer oriented? Do not hesitate, join us.
