

IT Advisory Consultant

Beijaflore is a management consulting firm created in 2000 that today employs more than 1000 persons across Paris, Brussels, Sao Paulo and New York. Our mission is to support our customers with their digital transformation projects and help them shape the future. Since its creation, the firm has been growing steadily based primarily on organic growth, as well as the acquisition of Headlink Partners in 2007, YKems in 2009 and Maksen in 2017. The Group aims to continue this growth in the coming years through the development of additional expertise and the acquisition of new consulting firms in France and abroad.

Would you like to advise key account CIOs in their transformation, migration and deployment projects?

The constant evolution of technologies forces companies to change their working methods. Our customers' CIOs are one of the essential support pillars of this transformation and increasingly deal with more and more complex requests. Operational efficiency, quality of customer service and flexibility are the main issues they face.

Our IT Advisory Business Unit with more than 320 people spread across all our offices around the world, whose mission is to promote technological solutions and implement innovative methodologies to support CIOs of key accounts in their IT transformation projects.

Our approach is based on 3 key questions:

- How can we optimise the design of our clients' new infrastructures so that they integrate a long-term vision and support the challenges of tomorrow?
- How can we integrate methodological, organisational or technological innovation?
- How can we simplify processes and improve the experience for the CIOs and their customers?

Would you like to work in innovative sectors: Cloud, Data, IoT ?

Within our teams, your mission will be to guarantee efficient, cost-effective and agile IT tools for our clients' IT Departments. You will help our customers improve the quality of their services and rationalise their costs and infrastructure. You will accompany them in identifying the essential means to properly manage their activities, and in implementing pragmatic and sustainable solutions.

You will be able to work on one of our four main areas:

- **Network:** Transformation, Deployment, New UCC networks.
- **Cloud:** Transformation, Cloud and Workstation, Migration, Service Provider.
- **Innovative IT :** IoT, Governance and Administration of Data.
- **IT Efficiency :** DevOps and Agility, Service Management, Financial Performance.

Would you like to build your career and evolve in a meritocratic environment?

At Beijaflore, there are professional opportunities for everyone. Evolving with us means benefiting from an agile meritocratic system that is clearly defined through six bands. On average consultants evolve from one band to the next within three years. Each band is associated with increasing levels of responsibility. Our goal is to support you in the development of your career path, and to allow you to benefit from our relocation opportunities in France and abroad.

Do you hold a Master's degree in Engineering or Business? Are you curious-minded and customer oriented? Are you curious-minded and customer oriented? Do not hesitate, join us.
