

Stagiaire Consultant(e)

Beijaflore is a management consulting firm created in 2000 that today employs more than 1000 persons across Paris, Brussels, Sao Paulo and New York. Our mission is to support our customers with their digital transformation projects and help them shape the future.

Our consultants work on more than 100 major accounts on missions ranging from program / project management to implementation in 3 areas of expertise:

- **Business Consulting:** identifying business opportunities brought by technological advances and supporting our customers in digitising their processes.
- **IT Advisory:** Promoting agile and efficient technology solutions and implementing innovative methodologies with our clients' CIOs
- **Cyber Risk & Security:** assessing Cyber risks and threats to our customers, helping to better detect them, and deploying innovative solutions to secure their business.

Since its creation, the firm has been growing steadily based primarily on organic growth, as well as the acquisition of Headlink Partners in 2007, YKems in 2009 and Maksen in 2017. The Group aims to continue this growth in the coming years through the development of additional expertise and the acquisition of new consulting firms in France and abroad.

Would you like to discover the Consultancy role?

During your apprenticeship, you will join one of our business units: Business Consulting, IT Advisory or Cyber Risk & Security depending on your profile and your interests. With your tutor, you will be required to work on missions and support our clients in their planning and realisation of projects related to digital transformation.

Are you looking for an informative and educational apprenticeship?

You will be fully integrated into the Group's consulting teams. Like them, you will carry out consulting missions at the same time as participating in the development of the firm through writing white papers, monitoring technological advances, participation in brainstorming meetings ... Supported by your tutor, you will also benefit from HR monitoring throughout your apprenticeship. The quality of our apprenticeships has been recognised by obtaining the Happy Trainees / Choose My Company label. 80% of our trainees join us on permanent contracts.

Do you hold a Master's degree in Engineering or Business? Are you curious-minded and customer oriented? Are you curious-minded and customer oriented? Do not hesitate, join us.
